

Summary

Strong passion for coding. Self-taught and eager to learn, with a strong technical foundation. Experienced in full-stack development, agile methodologies, and fostering collaboration. Proactive and versatile, committed to delivering high-quality results.

Experience

BUILDASOIL

FULL STACK DEVELOPER

Jan 2017 - Jun 2023

- Built an internal ERP system using the MERN stack with Next.js.
- Managed AWS and Vercel deployments for staging and production environments.
- Utilized tools such as Jira, Confluence, and ClickUp to drive team expansion, manage projects, establish KPIs, and improve software performance.
- Utilized design tools such as Photoshop, Illustrator, and Figma to create and enhance user interface elements, resulting in improved UX.
- Continuously identified opportunities for automation and process optimization.
- Wrote clean, efficient, and well-documented code following standards and best practices.
- Integrated software components and third-party APIs while ensuring code quality and standards through active participation in code reviews.
- Implemented a shipping algorithm that resulted in over \$100K in annual savings on shipping costs.

IT SPECIALIST

Feb 2015 - Jan 2017

- Managed and upgraded IT infrastructure, significantly improving security and system uptime.
- Maintained e-commerce channels and associated web applications.

KEENCODING

MY FREELANCE BUSINESS

Jan 2017 - Present

- Develop dynamic web solutions specializing in Node, React, Tailwind, Next.js, Next-Auth, Prisma, and MongoDB.
- Provide eCommerce solutions, including setting up and managing Shopify stores.

Skills

LANGUAGES

JavaScript (ES6+)
TypeScript
HTML5
CSS3
SASS
Node.js
Python

FRAMEWORKS

React.js
